Sociology - Luigi Tomasi 2019-10-16

The value of the book lies in its reassessment of the distinctive features of the Chicago School, of its contributions in the theoretical and methodological fields and of its influence on the growth of sociology throughout the world and in America in particular. The book pays particularly close attention to the eclectic nature of the research methods used by the Chicago sociologists as they sought to integrate subjective and objective aspects of human life. It demonstrates that this eclecticism formed an integral part of their theories but also emphasises that empirical observation, too, was important, although not as an end in itself. While, for example, they were working on the concepts of organization, marginality and interaction, they did not consider these as ends in themselves but as additions to the development of a more general theoretical approach. Often in the past, and wrongly, Chicago’s theoretical contribution has been restricted to the urban sector. The book clearly and unequivocally reveals how the tendency to see the Chicago School as a ‘theoretical’ is the result of misinterpretation and of a failure to realize that, for the sociologists of the period, understanding the social dynamics of the city of Chicago was tantamount to interpreting the central tendencies of modern society itself. The book analyzes how empirical observation was important but not an end in itself. The Chicago School developed a profusion of sociological theories in many areas of inquiry and never opted for any one particular approach. The various essays in the book also make it clear that the School decisively contributed to the development of qualitative and quantitative techniques.

Stalking Sociologists - Renee C. Fox 2017-07-05

Until recent years, the Federal Bureau of Investigation enjoyed an exalted reputation as America’s premier crime-fighting organization. However, it is now common knowledge that the FBI and its long-time director, J. Edgar Hoover, were responsible for the creation of a massive internal security apparatus that undermined the
very principles of freedom and democracy they were sworn to protect. While no one was above suspicion, Hoover appears to have held a special disdain for sociologists and placed many of the profession's most prominent figures under surveillance. In Stalking Sociologists, Mike Forrest Keen offers a detailed account of the FBI's investigations within the context of an overview of the history of American sociology. This ground-breaking analysis history uses documents obtained through the Freedom of Information Act. Keen argues that Hoover and the FBI marginalized sociologists such as W. E. B. Du Bois and C. Wright Mills, tried to suppress the development of a Marxist tradition in American sociology, and likely pushed the mainstream of the discipline away from a critique of American society and towards a more quantitative and scientific direction. He documents thousands of man-hours and millions of dollars dedicated to this project. Faculty members of various departments of sociology were recruited to inform on the activities of their colleagues and the American Sociological Association was a target of FBI surveillance. Keen turns sociology back upon the FBI, using the writings and ideas of the very sociologists Hoover investigated to examine and explain the excesses of the Bureau and its boss. The result is a significant contribution to the collective memory of American society as well as the accurate history of the sociological discipline. "This ground-breaking book documents in meticulous detail decades of harassment and surveillance of major American sociologists by the FBI. The misuse of power...will outrage all Americans a

Archival Strategies and Techniques-Michael R. Hill 1993-09-28 Historical and biographical work is becoming a more common type of qualitative research done by social scientists and usually requires the extensive use of formal archives housed in universities, governments, museums and other institutions. This practical and concise book provides an introduction for the novice on conducting archival research and covers such topics as contacting and preparing to work in archives, the protocol of using archives, and ways of organizing and referencing the useful data from the archive.

Sociology in America-Craig Calhoun 2008-09-15 Though the word “sociology” was coined in Europe, the field of sociology grew most dramatically in America. Despite that disproportionate influence, American sociology has never been the subject of an extended historical examination. To remedy that situation—and to celebrate the centennial of the American Sociological Association—Craig Calhoun assembled a team of leading sociologists to produce Sociology in America. Rather than a
story of great sociologists or departments, Sociology in America is a true history of an often disparate field—and a deeply considered look at the ways sociology developed intellectually and institutionally. It explores the growth of American sociology as it addressed changes and challenges throughout the twentieth century, covering topics ranging from the discipline’s intellectual roots to understandings (and misunderstandings) of race and gender to the impact of the Depression and the 1960s. Sociology in America will stand as the definitive treatment of the contribution of twentieth-century American sociology and will be required reading for all sociologists. Jane Addams and the Men of the Chicago School, 1892-1918-Mary Jo Deegan 1988

Case Study Methods-Jacques Hamel 1993-09-15 In this introduction to understanding, researching and doing case studies in the social sciences, Hamel outlines several differing traditions of case study research including the Chicago School of Sociology, the anthropological case studies of Malinowski, and the French La Play school tradition. He shows how each developed, changed and has been practiced over time. Suggestions for the practice of case studies are made for the novice reader and an additional feature is the extensive bibliography on case study methods in social science to allow for further exploration of the topic.
Forgotten Founders and Other Neglected Social Theorists - Christopher T. Conner 2019-05-14 This volume examines the work of ten sociologists who have been forgotten or neglected within contemporary sociology. Each chapter examines one of these marginalized scholars including a brief biographical sketch, an overview of the selected theorist’s work and significance, and the relevance of their work to one or more contemporary social issues.

The Anthem Companion to Robert Park - Peter Kivisto 2017-06 The Anthem Companion to Robert Park comes to terms with Robert Park’s legacy. This companion focuses largely on the work rather than the man, a major figure in American sociology during the first half of the past century, and encourages readers to consider the virtue of rethinking—and rereading—the much maligned and frequently misunderstood Park. Despite the fact that he wrote with exemplary clarity, Park’s work has often been ignored by contemporary sociologists. The contributions in this companion embrace no singular response to Park, but rather present a broad range of responses, generally appreciative but also critical.

The Astructural Bias Charge - Gil Richard Musolf 2016-08-02 This collection of outstanding essays addresses the concern of an astructural bias. Contemporary interactionists and their critics, social theorists, and students of sociology who are interested in assessing the ability of SI to fully address the social circumstances and social problems of an increasingly precarious world should read this book.

Encountering the Everyday - Michael Hviid Jacobsen 2008-11-12 Everyday life is something we tend to take for granted, something that just is, something unnoticed. But everyday life is perhaps the most important dimension of society – it’s where we live most parts of our lives with each other. This book provides a clear,
contemporary and comprehensive overview of the sociologies of everyday life. Looking at everyday activities and experiences, from language and emotions to popular culture and leisure, Encountering the Everyday explores what social structures, orders and processes mean to us on a daily basis. The book carefully leads the reader through historical developments in the field, beginning at the earlier Chicago school and finishing with up-to-date ideas of postmodernism and interactionism. Each chapter relates theoretical ideas directly to case studies and real empirical research to make complex concepts and core issues accessible, relevant and engaging. Written by leading international scholars in the field, this truly global book will inspire and inform all students and scholars of everyday life sociology.

Anthropologists and the Rediscovery of America, 1886–1965-John S. Gilkeson
2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886, when Franz Boas left Germany for the United States, until 1965, when the National Endowment for the Humanities was established. Five chapters trace the development within academic anthropology of the concepts of culture, social class, national character, value, and civilization, and their dissemination to non-anthropologists. As Americans came to think of culture anthropologically, as a 'complex whole' far broader and more inclusive than Matthew Arnold's 'the best which has been thought and said', so, too, did they come to see American communities as stratified into social classes distinguished by their subcultures; to attribute the making of the American character to socialization rather than birth; to locate the distinctiveness of American culture in its unconscious canons of choice; and to view American culture and civilization in a global perspective.

Culture, Power And History-Stephen J. Pfohl
2006 This volume brings together theoretical
meditations and empirical studies of the intersection of culture, power and history in social life. Contributors bring a diversity of critical sociological perspectives and subject matters to this important edited book.

**The Invention of Ethnicity**-Werner Sollors 1989 This important new collection of interdisciplinary essays charts the cultural construction of 'ethnicity' as embodied in American ethnic literature.

**Symbolic Interaction and Ethnographic Research**-Robert Prus 1996-01-01 Examines a series of theoretical and methodological issues faced by social scientists in interpretive and ethnographic studies of human group life.

**Urban Ethnography**-Richard E. Ocejo 2019-10-22 Showcasing the ideas, analysis, and perspectives of experts in the method conducting research on a wide array of social phenomena in a variety of city contexts, this volume provides a look at the legacies of urban ethnography's methodological traditions and some of the challenges its practitioners face today.

**Companion to Urban and Regional Studies**-Anthony M. Orum 2021-04-27 Indispensable overview and timely coverage of the major issues, debates, and research topics in urban and regional studies Companion to Urban and Regional Studies offers an up-to-date view of the rapidly growing field, exploring a diversity of theoretical perspectives, current and emerging research, and critical global policy concerns. Uniquely broad in geographical and thematic scope, this comprehensive volume brings together essays by more than fifty international scholars and researchers to provide expert assessments spanning the many dimensions of...
urban studies. Organized into five parts, the Companion begins with a review of the current state of cities across East Asia, Sub-Saharan Africa, North America, and Europe, Latin America, and all other world regions. Subsequent sections discuss contemporary theoretical perspectives, describe common methodological approaches used by urban scholars, and examine the political, social, and economic problems facing twenty-first century cities. Covering historical issues, current challenges, and comparative perspectives in urban studies, this timely resource addresses intensely debated policy issues such as governance, housing, policy mobilities, immigration and migration, segregation, social mix, and gentrification. Describes the use of demographic methods, advanced spatial analysis, comparative studies, and ethnographies in urban studies research. Discusses critical urban theory, feminist urban research, urbanization, environmental change, and the legacy of the Chicago School. Covers contemporary research topics such as urban and regional inequalities, social heterogeneity and diversity, financialization, and social networks. Includes representative case studies of each region, including Oceania, Latin America, East Asia and South Asia. Companion to Urban and Regional Studies is essential reading for scholars, researchers, practitioners, urban activists, and students, and it represents a must-have complement to The Wiley Blackwell Encyclopedia of Urban and Regional Studies.

**21st Century Sociology: A Reference Handbook** - Clifton D. Bryant 2007 21st Century Sociology: A Reference Handbook provides a concise forum through which the vast array of knowledge accumulated, particularly during the past three decades, can be organized into a single definitive resource. The two volumes of this Reference Handbook focus on the corpus of knowledge garnered in traditional areas of sociological inquiry, as well as document the general orientation of the newer and currently emerging areas of sociological inquiry.

**Chicago's New Negroes** - Davarian L. Baldwin 2009-11-30 As early-twentieth-century Chicago swelled with an influx of at least 250,000 new black urban migrants, the city became a center of consumer capitalism, flourishing with professional sports, beauty shops, film production companies, recording studios, and other black cultural and communal institutions. Davarian Baldwin argues that this mass consumer marketplace generated a vibrant intellectual life and planted seeds of political dissent against the dehumanizing effects of white capitalism. Pushing the traditional boundaries of the Harlem Renaissance to new frontiers, Baldwin identifies a fresh model of urban culture rich with politics, ingenuity, and entrepreneurship. Baldwin explores an abundant archive of cultural formations where an array of white observers, black cultural producers, critics, activists, reformers, and black migrant consumers converged in what he terms a "marketplace intellectual life." Here the thoughts and lives of Madam C. J. Walker, Oscar Micheaux, Andrew "Rube" Foster, Elder Lucy Smith, Jack Johnson, and Thomas Dorsey emerge.
as individual expressions of a much wider spectrum of black political and intellectual possibilities. By placing consumer-based amusements alongside the more formal arenas of church and academe, Baldwin suggests important new directions for both the historical study and the constructive future of ideas and politics in American life.

**Situational Analysis in Practice**-Adele E Clarke 2016-07-01 Situational Analysis creates analytic maps of social processes and relationships identified using grounded theory. Creator of the method, award-winning sociologist Adele E. Clarke and two co-editors show how the method can be, and has been, used in a variety of critical qualitative studies. The book-Updates the basic concepts and methods of situational analysis, a methodology created by Clarke;-Provides five important case studies of its use in a variety of health and educational settings;-Offers reflections from the original researchers on the studies and their impact;-Includes lists of published articles and available websites focused on situational analysis.

**Self, War, and Society**-Mary Jo Deegan 2017-09-08 George Herbert Mead (1863-1931) is a founding figure in the field of sociology. His stature is comparable to that of his contemporaries Emile Durkheim and Max Weber. Mead's contribution was a profound and unique American theory that analyzed society and the individual as social objects. As Mead saw it, both society and the individual emerged from cooperative, democratic processes linking the self, the other, and the community. Mary Jo Deegan, a leading scholar of Mead's work, traces the evolution of his thought, its continuity and change. She is particularly interested in the most controversial period of Mead's work, in which he addressed topics of violence and the nation state.
Mead's theory of war, peace, and society emerged out of the historical events of his time, particularly World War I. During this period he went from being a pacifist, along with his contemporaries John Dewey and Jane Addams, to being a strong advocate for war. From 1917-1918 Mead became a leader in voicing the need for war based on his theory of self and society. After the war, he became disillusioned with President Woodrow Wilson, with Americans' failure to support mechanisms for international arbitration, and with the political reasons for American participation in World War I. He returned to a more pacifist and co-operative model of behavior during the 1920s, when he became less political, more abstract, and more withdrawn from public debate. The book includes Deegan's interpretation of Mead's early social thought, his friendship and family networks, the historical context of America at war, and the importance of analysis of violence and the state from Mead's perspective. She also provides illustrative selections from Mead's work, much of which was previously unpublished.

**Philosophy, Social Theory, and the Thought of George Herbert Mead**-Mitchell Aboulafia 1991-01-01 This book brings together some of the finest recent critical and expository work on Mead, written by American and European thinkers from diverse traditions. For English-speaking audiences it provides an introduction to recent European work on Mead. The essays reveal the richness of Mead’s thought, and will stimulate those who have thought about him from very specific vantage points (behaviorism, symbolic interactionism, pragmatism, etc.) to consider him in new ways.
New Homes for Old-Sophonisba Preston Breckinridge
1921 New Homes for Old was one of ten volumes published by the Carnegie Corporation on "Methods of Americanization."
Reappearing near the end of four decades of massive immigration from Southern and Eastern Europe, the volumes were "to give as clear a notion as possible of the methods of the agencies actually at work in this field." Breckenridge's volume considers the immigrant homes and family life. Sophonisba Breckenridge was a major figure in the remarkable circle of women associated with Jane Addams's Hull House. She played a leading role in Progressive Era social research and in the development of professional social work. Published just a few years before restriction virtually ended immigration New Homes for Old holds great interest to contemporary students of immigration and ethnicity, women's history, and progressive reform. Surprisingly, it has been virtually unknown. This is an account of how immigrants actually lived-what they ate, how they shopped, how much money they saved, what kind of clothing they wore, how they organized households and cleaned their homes, how parents raised children, and a host of other issues. Rich in descriptive detail, it contains numerous examples of actual immigrant families and organizations. Breckenridge considers issues largely ignored in the historical literature on immigration, providing useful primary sources to supplement the secondary literature on immigration in this period. She also reveals a great deal about how progressive reformers and social scientists viewed immigrants. Her work reflects the general conclusion of Chicago School sociologists and reformers that rural immigrants underwent dramatic "social disorganization" upon arrival in urban America. Steven J. Diner's new introduction places New Homes for Old in the context of the Americanization movement, which was greatly invigorated by World War I domestic mobilization. This volume is an invaluable primary source for the history of home economics and social work, professions.
dominated from the start by women. As such it will be of interest to those interested in immigration and ethnic history, women's history, social welfare, and the Progressive Era. Steven J. Diner is professor and Dean of the Faculty of Arts and Sciences at Rutgers University, Newark. He is the author of many articles and books including A City and Its Universities: Public Policy in Chicago, 1919-1992, and A Very Different Age: Americans of the Progressive Era.

**Encyclopedia of the City**-Roger W. Caves 2005

The "Encyclopedia of the City" complements Routledge's strong list of readers and textbooks in urban studies and the city. Focusing on the key topics encountered by undergraduates and scholars in urban studies and allied fields, the contributions of its major theoreticians and practitioners, and on other individuals, groups, and organizations which study the city or practice in a field that directly or indirectly affects the city, the "Encyclopedia" necessarily adopts an interdisciplinary and multidisciplinary perspective. A first-class work of reference that will be both an essential resource for independent study as well as a useful aid in teaching, this is a solid but also provocative starting point for wider exploration of the citizenship; city; city beautiful movement; City of Ur; city typologies; civil rights movement; civil society; classicism; closed circuit television

**Developing Grounded Theory**-Janice M. Morse 2016-07-01

Grounded theory is the most popular genre of qualitative research used in the health professions and is widely used elsewhere in the research world. In this volume, six key grounded theory methodologists examine the history, principles, and practices of this method, highlighting areas in which different strands of the methods diverge. Chapters cover the work of Anselm Strauss, Barney Glaser, Leonard Schatzman, and the postmodern and constructivist schools. Dialogues between the participants sharpen the debate and show key topics of agreement and disagreement. This
volume will be ideal for courses on grounded theory that wish to show the ways in which it can be used in research studies.

**Letters across Borders**-B. Elliot 2006-09-02
This collection addresses the recent rebirth of interest in immigrant letters. As these letters are increasingly seen as key, rather than incidental, documents in the interpretations of gender, age, social class, and ethnicity/nationality, the scholars gathered here demonstrate a diversity of new approaches to their interpretation.

**Essays on Social Psychology**-George Mead 2017-09-08 George Herbert Mead (1863-1931) is a central, founding figure of modern sociology, comparable to Karl Marx and Max Weber. Mead's early work, prior to his posthumous publications that appeared after 1932, is believed to be a series of articles contemporary scholarship defines as disconnected. A previously unknown, never published set of galleys for a book of essays by Mead, written between 1892 and 1910, unites these articles into a logical perspective. Essays on Social Psychology, Mead's "first" book, clearly locates him within a significantly different tradition and network than documented in his posthumous volumes. The discovery of this work is a major scholarly event. Instead of being abstract and unemotional, as some scholars argue, Mead's early scholarship focused on the significance of emotions, instincts, and childhood as well as political issues underlying political problems in Chicago. During these early years, he was involved with the emerging Laboratory Schools at the University of Chicago which was then the center of progressive education. These early topics, interpretations, and scholarly networks are dramatically different in these writings from those of Mead as a mature scholar. They demonstrate that he was clearly making a
transition from psychology to social psychology at a time when the latter was in its infancy. Mary Jo Deegan, a world-renowned Meadian scholar, has comprehensively edited this volume, footnoting now obscure references and authors. Her introduction explains how this previously lost manuscript affects contemporary Meadian scholarship and how it reflects the city and times in which he lived. Unlike the posthumous volumes, assembled from lecture notes, Essays in Social Psychology is the only book actually written by Mead and challenges most current scholarship on him. The selections are highly readable, surprisingly timely yet historically significant. Psychologists, sociologists, and educators will find it immensely important.

George Herbert Mead (1863-1931) taught at the University of Chicago from 1894 to 1931. His posthumous volumes are The Philosophy of the Present, Mind, Self, and Society, and The Philosophy of the Act. Mary Jo Deegan is professor of sociology at the University of Nebraska, Lincoln. She is the author of Jane Addams and the Men of the Chicago School, 1892-1918, named by Choice as among the outstanding academic books of 1989.

**The Bureau of Sociological Research at the University of Nebraska-Lincoln** - Michael Hill 2016-09-01

**Communication and Community** - Gregory J. Shepherd 2000-12-01 This distinctive volume combines synthetic theoretical essays and reports of original research to address the interrelations of communication and community in a wide variety of settings. Chapters address interpersonal conversation and communal relationships; journalism organizations and political reporting; media use and community participation; communication styles and alternative organizations; and computer networks and community building; among other topics. The contents offer synthetic literature reviews, philosophical essays, reports of original research, theory development, and criticism.
While varying in theoretical perspective and research focus, each of the chapters also provides its own approach to the practice of communication and community. In this way, the book provides a recurrent thematic emphasis on the pragmatic consequences of theory and research for the activities of communication and living together in communities. Taken as a whole, this collection illustrates that communication and community cannot be adequately analyzed in any context without considering other contexts, other levels of analysis, and other media and modes of communication. As such, it provides important insights for scholars, students, educators, and researchers concerned with communication across the full range of contexts, media, and modes.
